# SAFE AND EFFICIENT CONTAINER HANDLING

At VDL Container Systems we produce demountables for recycling, logistics, infrastructure, construction, industry and agriculture. Not only production of high volumes, but also as customised turn key solutions. Our in-house engineers design products tailored to specific requirements. This approach is an essential part of our business philosophy, as are the high quality standards, short delivery times and reliability that have helped us to be one of the leading players in the container handling sector.

The loading, tipping and unloading of containers must also take place easily and safely. That is why we offer top of the market high-quality systems you can rely on, day in, day out. With short leadtimes and service from dealers and agents around the world, we prevent downtime of your processes. The uptime saves money and emissions.

## Spreaders & demountables

You will find our spreaders in ports, container terminals and intermodal terminals. With hooklift, skiploader, cable and chainlift systems, we also supply demountables for trucks, trailers and vehicles for the agriculture, construction, waste collection, industrial, logistics and service sectors.

Parts of the supply chain for our container handling systems are sourced at our VDL Groep sister companies. We then weld and assemble the demountables in-house. This gives us the flexibility to produce what you need at any time. Moreover, by doing so, we attain the very best quality. Through our online dealer portal, you can therefore quickly arrange a suitable body, service and spare parts.

The fact that we have been in the industry for decades does not make us any less innovative. On the contrary, by listening carefully to you, we continue to innovate our container handling systems and make them safer and more reliable, day after day. There is a reason we are the market leader in the Benelux!

### ▶ AT A GLANCE

- Spreaders and demountables for safe and efficient container handling
- Short leadtimes of reliable, high-quality, innovative systems
- Market leader in the Benelux
- Global dealer network for local sales, after-sales and service
- Team of over 150 professionals
- Division of VDL Groep

# WHAT YOU CAN EXPECT FROM US

## Flexibility

What kind of system you need depends on a number of things, such as what you process or transport, the weight to be handled and the chassis on which the system must be mounted. This is why we do not push our standards but yours; you configure your own system with our specialists. That way, you always work with a solution that is perfectly suited to your situation. We are your solutions provider.

## Quality

Quality is paramount in everything we do, from our products to our communication and service. This is reflected in our ISO certifications and reliable systems. Our products are known for being robust and reliable. By carefully selecting and training our dealers, we keep your equipment at peak performance. That means you can continue working efficiently.

## Innovation

The world is changing, and we are continuously adapting accordingly. In the world of today we are challenged to make our spreaders and demountables even smarter. This includes innovations like automatic notifications when your system requires maintenance and collecting data to solve problems quickly or prevent for a better uptime ratio. Moreover, energy efficiency, renewable fuels and electrification are among our focus areas, as part of our contribution to creating an eco-friendly professional container handling world. Thus, by choosing our environmentally friendly systems, you not only save costs but also contribute to an improved ecological footprint.

## Safety

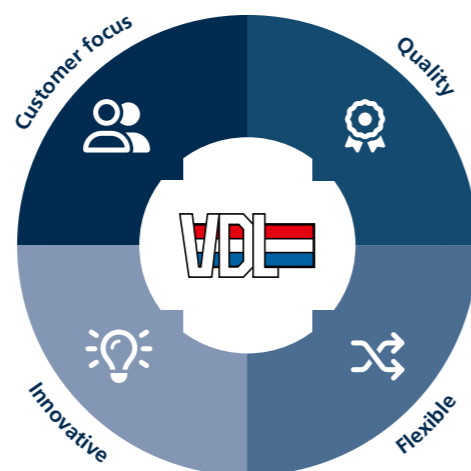

You need to be sure you can safely handle thousands of tonnes. Not just today, but on into the future as well. By putting safety first in our designs, we prevent interruptions in availability. Here, too, we make use of important information from the field. Among other things, we work with the customer to regularly monitor real-world use of the systems. And then our team of engineers leverage this data to create an even better design.

## Accessibility

Our production site is in Hapert, south of Eindhoven, near the Belgian border. While this is a very central location, we also have a successful, well-established network of dealers and agents around the world. So there is always a dealer near you. And this ensures that your systems will be fully operational in no time.

## Speed

Delays in your processes cost money. Therefore, your container handling system needs to work quickly and efficiently. And equally important, keep working. We understand this, so you can expect exceptionally fast delivery of our products and parts. And when your systems need maintenance? Our dealers, agents and service technicians keep them running.

“ WE HAVE BEEN A PARTNER OF VDL CONTAINER SYSTEMS FOR MANY YEARS. THE ROBUST DESIGN OF THE HOOKLOADERS AND SKIPLOADERS FORMS THE CORNERSTONE OF THIS RELATIONSHIP. THEY ARE LOW-MAINTENANCE, WHICH ENSURES YEARS OF DEPLOYMENT AT A LOW TOTAL COST OF OWNERSHIP! WE ARE PROUD OF THE MANY VDL CONTAINER SYSTEMS THAT ARE ACTIVELY DEPLOYED IN THE WESTERN NETHERLANDS ON A DAILY BASIS. ”

**Peter Wester**  
Director Bevako Truck Hydraulics

# OUR PRODUCTS AND SERVICES

## › DEMOUNTABLES

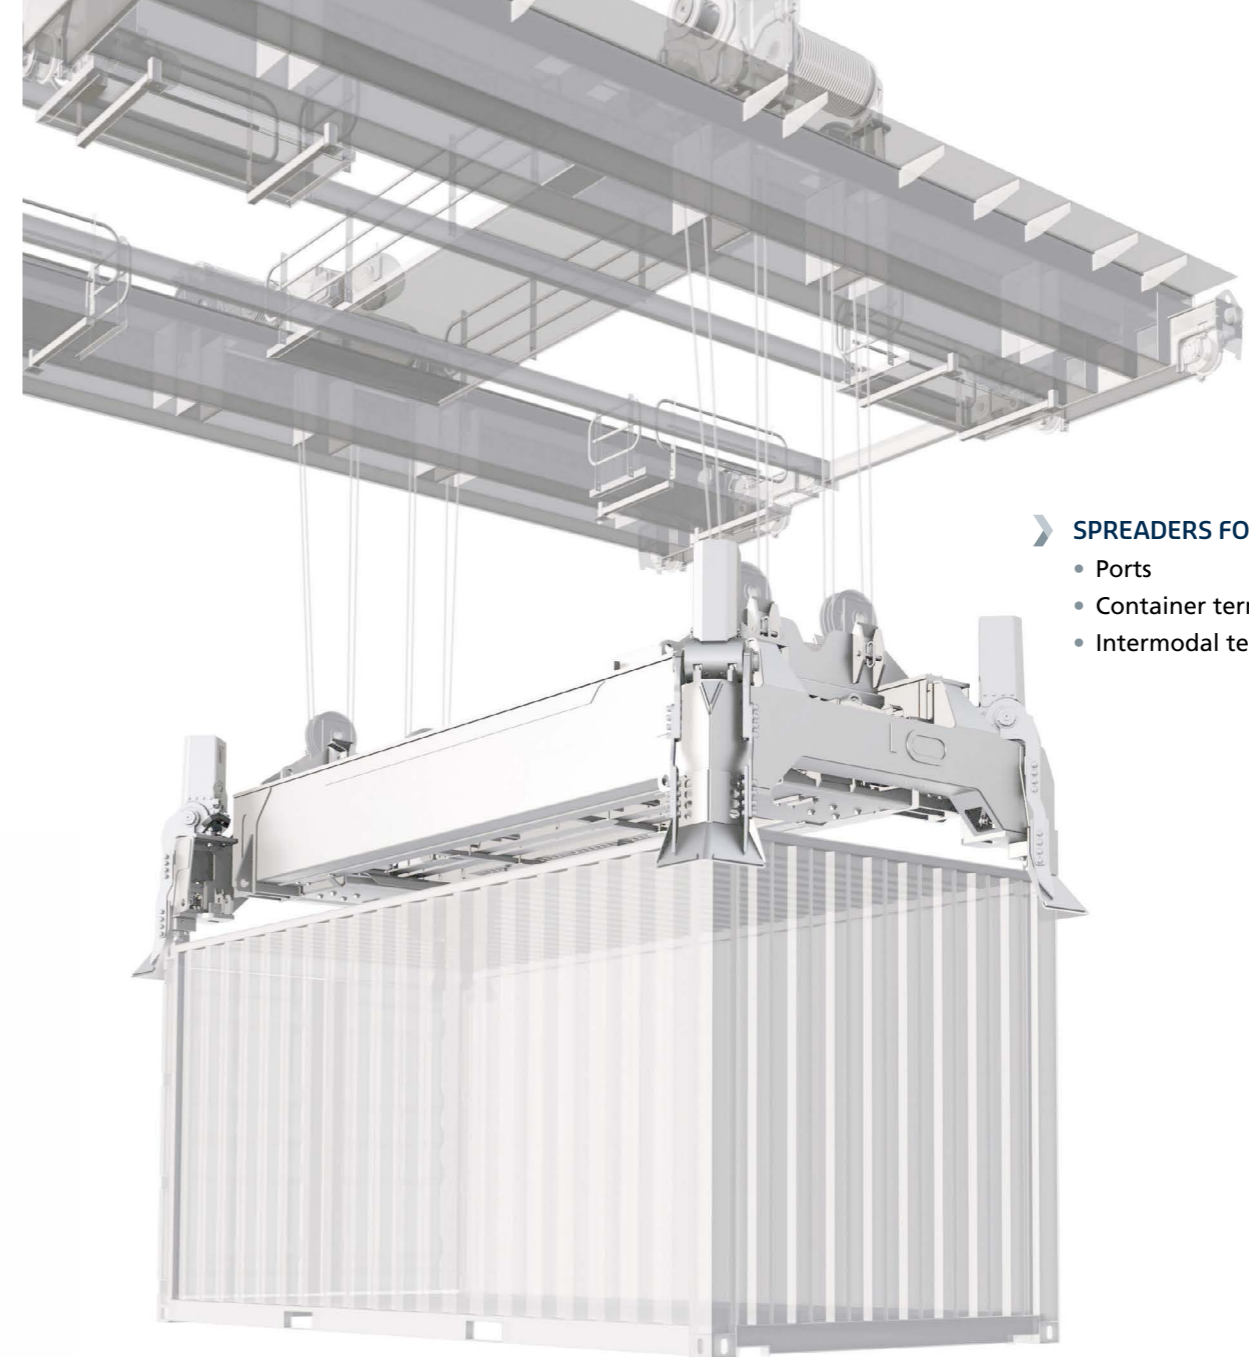

- Hookloaders
- Skiploaders
- Cable systems
- Chainlift systems

For trucks, trailers and vehicles  
in the following sectors:

- Agriculture
- Recycling
- Industry
- Logistics
- Services

## › OUR OWN PRODUCTION LOCATION

## › SALES OF SYSTEMS, SPARE PARTS AND SERVICE THROUGH DEALERS AND AGENTS

## › SPREADERS FOR:

- Ports
- Container terminals
- Intermodal terminals

WE CAN LOOK BACK ON A VERY SUCCESSFUL AND HARMONIOUS BUSINESS RELATIONSHIP WITH VDL CONTAINER SYSTEMS. VDL'S STRATEGY IN PARTICULAR MATCHES OURS WHEN IT COMES TO CUSTOMER FOCUS, TAKING CHANCES AND TACKLING CHALLENGES. WE ARE HAPPY TO HAVE SUCH A STRONG AND RELIABLE PARTNER ON OUR SIDE.

**Markus Valks, Leiter Fahrzeugtechnik  
Michels GmbH & Co. KG**

# MOBILITEIT ONE OF VDL GROEP'S WORLDS

Mobility is vital to today's world and to the economic success of societies. At the same time, the increasing mobility also creates challenges in terms of accessibility, health and the quality of nature and the living environment. In order to make our world cleaner and more sustainable day by day, VDL is hard at work on mobility solutions, electrification and reducing emissions.

We are an important manufacturer in the world of mobility solutions. In this world, we focus on 'smart' mobility issues, such as design, electrification, connectivity, autonomous driving and mobility as a service. Our mobility solutions are designed in-house, allowing us to apply them to other forms of transport as well. Increasingly, we are developing vehicles as 'data collectors'. These provide feedback not only on their own performance, but also, for example, on their impact on the living environment. All this contributes to creating the liveable cities of tomorrow.

DUE TO THE WIDE VARIETY OF OPTIONS THAT VDL CAN OFFER, WE CAN SUPPLY THE RIGHT CONTAINER HANDLING SYSTEMS TO EVERY CUSTOMER.

**Reto Trösch**  
Directeur Trösch AG Fahrzeugbau

## VDL GROEP STRENGTH THROUGH COOPERATION

VDL Container Systems is proud to be part of VDL Groep. VDL Groep, with its headquarters in Eindhoven, 100 companies and more than 15,000 employees in 19 countries, focuses on high innovation values and acquiring a unique position in each industry. At VDL Groep we believe that technology helps to improve our lives and society as a whole. We therefore continuously endeavour to create products and solutions that reflect and contribute to this ethos so that we can add value to the world around us.

Diversity is in our DNA. VDL develops and manufactures a wide variety of industrial and innovative products and machines, from parts to finished products, in the fields of 'Mobility', 'Science, Technology & Health', 'Energy & Sustainability', 'Infratech' and 'Foodtech'. We are always driven to make a difference. By thinking. By doing. And by combining craftsmanship and innovation.

As one of the largest family-run companies in the Netherlands, we are at the heart of our society. And honesty, respect and accessibility are values we hold dear. Today, and tomorrow.

**We are VDL. We stand for strength through cooperation.**
